Concerning : Letter of Recommendation Promostal

To Whom it may concern,

For the Yunlin Offshore Windfarm project, for which Smulders was contracted for the fabrication of 40 transition pieces and 40 additional E-units, we engaged with Promostal for subcontracting the secondary steel fabrication for all 80 E-units.

I want to share my appreciation for the cooperative way in which the project is finalized, where Promostal delivered the parts in a timely and qualitative manner, despite the challenging schedule and requirements.

Throughout the different steps in the process, Promostal acted professionally in a transparent and honest way, and therefore has proven to be a reliable partner for the fabrication of secondary steel components for the offshore wind industry.

With thanks.

Yours faithfully,

Dirk T'jampens
Project Manager
Smulders
