## Letter of recommendation

Skanska Norge AS had the pleasure of working with Promostal on the Bybanen C-31 project in Bergen, Norway in the period of April-June 2015.

Promostal was subcontracted to the following scope of work:

- Full design of 30,5 meter height steel tower
- Fabrication of steel structure
- Galvanizing
- Oversize transport to site
- Assembly of steel structure

All works were carried out in accordance with our requirements and our satisfaction. The quality of the work performed by the steelworkers and welders in factory was very impressive as well as the assembling on site. PROMOSTAL's staff has followed all our safety regulations without any incidents. Skanska found PROMOSTAL to be an outstanding subcontractor exhibiting the finest qualities in terms of their product, work, flexibility and efficiency in management.

Skanska Norge AS can recommend PROMOSTAL as a very competent partner to work with. We are looking forward to work with PROMOSTAL in future projects.

Yours sincerely,  
Skanska Norge AS
