REFERENCE - Promostal

Aalborg Energie Teknik a/s acknowledges the involvement of Promostal Sp. z o.o. sp.k. in the completion of the Green Valley Energie project. Promostal was responsible for executing, delivering, and assembling steel structures for the biomass-fired plant. Their work met required specifications and industry standards. Promostal demonstrated flexibility and proactive problem-solving, contributing to the project's success. Based on our experience, we confidently recommend Promostal as a reliable partner for steel structure execution and assembly.

Sincerely,

Aalborg Energie Teknik A/S
